

Supply Chain Management and Disaster Resilience

Tornados, floods, excessive heat, cold or snow. How could your business be impacted? What does it mean for your customers?

How well you plan will dictate the magnitude of the losses and the speed of recovery. Planning for natural disasters improves the efficiency of response and accelerates recovery.

Joan Landry is Program Manager, Crisis & Business Continuity Management for Abbott. Joan has developed, implemented and managed strategic programs to prevent negative impact to the Abbott business. She's led the development of Business Continuity Plans (BCP) in 12 manufacturing sites, and was recognized with the President's Award for her crisis management support after the Great East Japan Earthquake.

Learn how to prepare your business for disaster and the expectations your customers may have of you when one occurs:
